

# Dynamic Risk Assessment

## COURSE DURATION:

1 ½ hours

## TARGET AUDIENCE:

- Police services

## AVAILABLE IN:

- Audio

## DELIVERED VIA:

- Internet
- Intranet

This course is aimed at anyone working in the police services sector who is likely to attend operational incidents where hazards are immediate and unpredictable, and risks are liable to rapid change.

This situation requires an ability to rapidly recognise hazards, assess risks and make the right decisions – in other words to conduct dynamic risk assessment.

Dynamic risk assessment is a crucial element of a police officer's skill set, enabling him or her to control situations and make decisions that ensure the safety of police and public alike.

This Safety4Business' course will enable participants to 'Stop and Think', conduct dynamic risk assessment and control the 'Red Mist' that too often clouds judgement at the scene of an operational incident.

## Course Content

- The nature of risk in operational incidents
- The legal health and safety responsibilities of police officers
- The dynamic risk assessment process
- 'Red Mist' and its effect on good judgement
- Combating Red Mist with DRA
- DRA in action – practical examples

## Key Content:

- The case for DRA
- 'Red Mist'
- DRA in action
- Stop and Think
